

Barracuda NG Firewall

Provides application and identity-aware protection for distributed networks

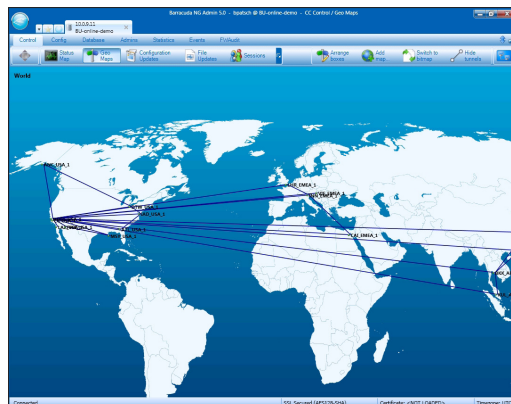

The Barracuda NG Firewall is a family of hardware and virtual appliances designed to protect network infrastructure, improve site-to-site connectivity and simplify administration of network operations. Beyond its powerful network firewall and VPN technologies, the Barracuda NG Firewall integrates a comprehensive set of next generation firewall technologies, including Layer 7 Application Control, intrusion prevention, Web filtering, anti-virus, anti-spam and network access control.

Central Management Across the Enterprise

With hardware models available for branch offices up to headquarters and data centers, and a corresponding offering of virtual appliances, the Barracuda NG Firewall is designed for deployment across the entire enterprise. Through the Barracuda NG Control Center, administrators can manage security, content and traffic management policies from a single interface. Centralized management of security and content policy provides a number of benefits, including:

- Consistent security posture and policy enforcement across the enterprise
- Real-time accounting and reporting across multiple gateways
- Comprehensive history and rollback of configuration and policy changes across the network
- Centralized version control of anti-spam, anti-virus, content filtering and Network Access Control updates

The Barracuda NG Firewall features intelligent site-to-site traffic management capabilities that optimize both availability and performance of the Wide Area Network. Administrators can control application-level routing and prioritization of traffic across multiple links, tunnels and traffic conditions. Supported link types include dedicated lines, xDSL, 3G wireless mobile networks, and any other link types presented as a copper or optical Ethernet link.

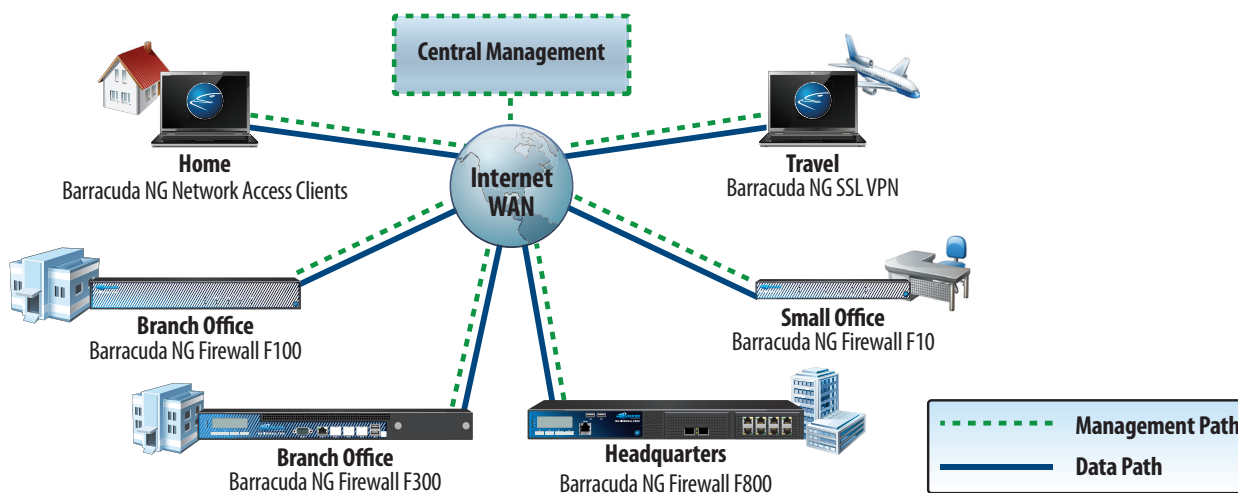

The Barracuda NG Firewall Control Center provides centralized, real-time monitoring of all the firewalls across the enterprise.

Stops Threats and Reduces Administrative Overhead

The Barracuda NG Firewall is an application-aware firewall designed to mitigate threats, enforce policies and optimize traffic flow – resulting in ultra reliable WAN links. Centralized management provides visibility of the entire network, reducing administrative overhead.

PARTIAL FEATURE LIST

Firewall / VPN Features

FIREWALL

- Stateful packet forwarding
- Intrusion Prevention (IPS)
- Transparent proxying (TCP)
- NAT (src,dst,nets), NAT, PAT
- Object-oriented rule sets
- Dynamic rules / timer triggers
- Virtual rule test environment
- Jumbo frame support

TRAFFIC OPTIMIZATION

- Link monitoring and aggregation
- Policy routing
- Traffic shaping
- On-the-fly flow reprioritization
- WAN compression

INFRASTRUCTURE SERVICES

- DHCP server, relay
- HTTP, SSH, FTP proxies
- SMTP gateway and spam filter
- WiFi (802.11b/g) access point on select models
- Authentication – supports x.509, NTLM, RADIUS, RSA SecurID, LDAP/LDAPS, Active Directory, TACACS+, local authentication

PROTOCOL SUPPORT

- IPv4, ARP, IPv6 (2011)
- VoIP (H.323, SIP, SCCP [skinny])
- RPC protocols (ONC-RPC, DCE-RPC)
- 802.1q VLAN
- IPinIP and GRE tunnels
- OSPF/RIP router
- SNMP agent

VPN

- PPTP / L2TP (IPSec)
- Supports AES-128/256, 3DES, DES, Null ciphers
- Private CA or external PKI
- IPsec VPN clients for Windows, Mac, Linux
- Application-aware traffic intelligence across sites

HIGH AVAILABILITY

- Active-active¹ or active-passive
- Network notification of failover
- Transparent failover without session loss
- Encrypted HA communication

Security Options

- Barracuda NG Web Security
 - Barracuda NG Web Filter
 - Barracuda NG Malware Protection
- Barracuda NG Secure Web Proxy (HTTPS traffic inspection option)
- Barracuda NG SSL VPN and NAC
 - Clientless access from Web browsers
 - Network Access Control validates client security access

Central Management Options

BARRACUDA NG CONTROL CENTER

- Standard Edition
 - 1 configuration grouping
 - Unlimited firewalls
- Enterprise Edition (1 tenant)
 - Single tenant
 - Unlimited configuration groupings
 - Unlimited firewalls
- Global Edition (multi-tenant)
 - Support for 5 tenants included
 - Unlimited configuration groupings
 - Unlimited firewalls
 - Additional tenant licenses available

Support Options

ENERGIZE UPDATES

- Standard technical support
- Firmware updates
- Layer 7 application definitions for control of more than 800 applications

INSTANT REPLACEMENT SERVICE

- Replacement unit shipped next business day
- 24x7 technical support
